DETAILED ACTION

Withdrawn Rejections

1. The 35 U.S.C. 103 rejection of record in Paper #7, Page 3, Paragraph 4 has been withdrawn due to Applicant's arguments in Paper #9.

New Rejections

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goto et al. (USPN 6,342,176) in view of Sato et al.

Goto et al. discloses a door trim panel (Figure 7) containing a speaker grille with a plurality of holes (Figure 7, #452). As can be seen in Figures 7 and 8, the resin molding contains a base portion (Figure 8, #30) in which the speaker grille is formed and surrounded by the base portion (Figure 7, #452 and 30). The base portion is formed by polypropylene foam (Column 6, lines 28 – 32 and lines 36 – 38).

Art Unit: 1772

Goto et al. discloses the claimed device except for the foamed layer in the base portion having a density of not greater than 0.6 g/cm^3 and an average expansion ratio of the speaker grille is 1 to 1.3 times. Sato et al. discloses that it is known in the art to provide a foam layer in a speaker, where the foam is polypropylene having a density between 0.32 to 0.93 g/cm^3 with expansion ratios from 1 to 2.90 (Figure 10). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the polypropylene foam material of Goto et al. with the properties of the polypropylene foam material of Sato et al. in order to give the grille high rigidity while having resistance to water and other environmental factors.

Response to Arguments

4. Applicant's arguments with respect to claims 1 – 2 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia L. Nordmeyer whose telephone number is (703) 306-5480. The examiner can normally be reached on Mon.-Thurs. from 7:00-4:30 & alternate Fridays.
